KEY FEATURES

WET AND DRY CONFIGURATIONS
Quickly change bucking profiles as strains and conditions demand.

SCALE AS YOU GROW
Modular upgrade kit allows you to double your production when you need it.

FEEL THE POWER
The 1/2 HP USA Made LENZE motor delivers massive torque for non-stop bucking.

100% PRESSURE-WASHABLE
IP-65 rated components make pressure washing fast and easy.

GMP COMPLIANT
Stainless steel touchpoints and an easy to clean design make for easy GMP compliance.

BUILT TO LAST
Robust design and USA made components are built for years of reliable service.

MORE ABOUT

The Triminitor® Buckmaster is built for commercial ag with a modular design that doubles production as you grow.

Designed with Triminitor's proprietary SmartMod system the Buckmaster can easily be upgraded to double production capacity when you need it. The stainless steel and aluminum construction is built to last, and washdown grade components make cleaning fast and easy. Finally, customizable height, ergonomic material holders, and an emergency stop keep operators safe and productive.
