

## SCREEN USAGE FOR THE MOBIUS M210 MILL

The Mobius M210 is a continuous throughput mill with several screen options to customize output ranging from coarse to fine. The chart below outlines the specifications and intended use for each screen, though the Mill operates very differently depending on the strain and moisture. Some customers may use different screens on different stains for the same process.

### COLOUR-CODED MEANINGS:

- = recommended use
- = can be used depending on strain and moisture content
- = not recommended for this product

| PART #                    | DESCRIPTION                    | HOLE SIZE (MM) | HOLE SIZE (IN) | TYPE       | PRE-ROLLS | CO2 EXTRACTION | ETHANOL EXTRACTION | HYDROCARBON EXTRACTION |
|---------------------------|--------------------------------|----------------|----------------|------------|-----------|----------------|--------------------|------------------------|
